

# (1/5/24) Attention Members:

## **AN UPDATE FOR OUR INDOOR LAP POOL REPAIRS AND RENOVATION PROJECT:**

Similar to any commercial building repair/renovation project, particularly within the aquatic industry, we are facing a few circumstances that have caused delays in our original timeframe for this space's closure. Specifically, holiday timeframes with vendor closures, delays/backorders in necessary parts, and unexpected sourcing issues.

Our first priority is to maintain transparent communication to our members and guests throughout these challenges and manage the adjustments and expectations to the best of our capacity. With this in mind, we are actively working on any necessary revisions and things that we can complete, in-house. Prior to the re-opening of the Indoor Lap Pool, the main walkway and Coed Spa will be opened as soon as possible, after the necessary inspection and safety approvals.

Our team is doing everything possible to make this timeframe as short as possible, while not hindering the necessary repairs and renovations that have been needed. **We are working hard to get delivery commitments from the suppliers and will continue to update everyone as soon as possible.**

Our Warm Water Pool remains a shared space during this timeframe. We ask that all members and patrons continue to work together.

\*\*Group Swim Lesson families – adjustments have been made for all levels to be held in our Warm Water Pool during this closure. Please see separate email communication.\*\*

We apologize for any inconvenience. We appreciate your understanding.  
Thank you! -LCP Management
